WARNING: Modifying an original equipped vehicle will result in a vehicle handling differently. All types of suspension modifications will affect reaction, ride, handling and wear and tear rates of a vehicle and its components. Abrupt maneuvers, sharp and sudden turns, and weather conditions will increase the vehicle’s susceptibility for loss of control. Death and serious injury could be the result if you fail to operate a modified vehicle safely. Know and follow the laws of the states.

SUPPORTING MANUFACTURERS:

For nearly three decades, Ground Force company founders have been fiercely committed to developing the finest suspension kits and components available. The current product line is the result of those years of dedication and intensive efforts. Use an inferior-quality lowering kit and you could turn your best ride into your worst nightmare. Driveline alignment, tracking, handling and ride quality could be severely compromised. Small bumps could send shock waves up your spine. And chassis vibration could become the new soundtrack to your life. But do it right, and the results will astound you. For more information, visit www.groundforce.com.
The smoking horsepower and style sums up a Lightning! Complement those with Ground Force's assortment of lowering kits. Lower your center of gravity and get the look you need and crave without sacrificing ride or launch. Hit the ground running with Ground Force!

The New F-150 is a hit and its slick lines scream to be lowered. Ground Force does it right with a coil, flip kit and bump stops, or rear leaf springs set up which include our specially tuned, high-pressure nitrogen gas charged shocks. Put them together for a whole new look and the boulevard will never be the same.

**Shock Features**

- High Pressure Nitrogen Gas Charged - For improved ride and handling, helps maintain tire to road contact by reducing air resistance.
- 3/8" Hole - More optimal operating pressure than standard 1" bore units.
- Truethane Bushings - Longer lasting and more durable than rubber bushings.
- 10-Stages, Full Displaced Valving - Better valving range on both the compression and extension cycles of the unit for a smooth, trouble-free ride.

Ground Force nitrogen gas charged shocks are designed and manufactured to critical quality standards for optimum performance.

**Shock Applications**

- **C-15 Chevy GMC**
  - 1996: 70040, 70042/70044
- **S-10 15 Pickup Blazer Jimmy**

Vehicle equipped with Kit #9945 with more than 2" of front drop using stock wheels and tires could result in tire to inner fender clearance problems.

**Sport trucks to the bone, these sleek models are turned into some of the hottest customized trucks on the road. Upgrade your suspension with one of these Ground Force drop kits and you’re ready to hit the streets with a sleeker look and hotter handling.**

**Ground Force Proving Ground.**

**COILS & BLOCK KITS**

Precision engineered coil springs are designed to work with or without Ground Force spindles to provide 1-3" of additional drop. Coils are hot wound for precise fit, quenched, shot peened and powder coated for sleek looks and corrosion resistance.

- All Ground Force blocks are made of super-strength ductile iron. 1" block mild steel. Are available in 1", 2" and 3". (Includes U-Bolts)

**NEW! TORSION KEYS**

Ground Force offers our exclusive precision re-indexed leveling torsion bar keys. When applicable, these keys allow vehicles with front torsion bars to be lowered/ level while maintaining alignment specs and a quality ride. Find these quality ductile iron keys in complete kits or as individual components.

**REAR LEAF SPRINGS**

Ground Force offers both mono-leaf and multi-leaf lowering rear springs for today’s most popular trucks. Our mono-leaf springs provide maximum drop while maintaining good ride characteristics. Our multi-leaf design provides maximum drop at an economical price. Quick and easy installation compared to other methods of lowering. All springs are replacement springs with lowered ride height.

**SPINDLES**

Ground Force spindles provide 2.5" of drop for today’s hottest trucks and sport utilities. These spindles are made of ductile iron, reinforced in high-stress areas with heat-treated axle shafts. From the high-strength alloy bearing surfaces to the built-in steering stops, each model is designed for maximum wheel back spacing of 3.12" to fit a variety of wheels.

**AUTHENTIC COMPONENTS**

**BY GROUND FORCE**

**NEW!**

**NEW!
If there is a truck on the road that will put you back in your seat, it’s the Dodge Ram. Great lines and full of power, add to that a Ground Force tuned suspension kit. A complete kit with all the essential goodies, coils, patented flip kit and (4) shocks. Do it right with Ground Force!
